ABOUT THE WORKSHOP

AI Hype vs. Reality: The workshop clarifies misconceptions and differentiates real capabilities from overblown AI promises.

Ethical Considerations: Focus on the ethical implications of AI in decision-making, data use, and automation.

Bias and Fairness: Addresses AI's inherent bias, exploring ways to detect and mitigate algorithmic discrimination.

Transparency in AI: Emphasizes the need for explainability in AI models to build trust and accountability.

Data Privacy: Discusses the risks AI poses to user privacy and potential solutions for secure data handling.

Ethical AI Design: Promotes designing AI with ethical guidelines in mind, preventing unintended consequences.

Human-AI Collaboration: Stresses how AI should augment human skills rather than replace human roles entirely.
